

# CITY OF GENESEE

Location: 235 W Chestnut Street, (Fire Station) Genesee, ID 83832

**Water and Waste water Update**  
**Presented by Mountain Waterworks**

## NOTES

November 9, 2021  
6:00 PM

Present at the meeting, Mayor John Hermann, Council Members Nyla Roach and Bill Krick, Deputy City Clerk/Treasurer Debi Zenner and Maintenance Supervisor Dustin Brinkly

Visitors: Nancy Feigenbutz, Tim Becker and Jesse Aherin

Ryan Rehder gave an overview and handout of what the wastewater project will look like. He said the design portion of the project is approximately 60% complete and the budget portion approximately 30% and he feels good about where we currently are.

**GARFIELD LIFT STATION:** Terrence discussed how this will be routed and all it entails. We are crossing Cow Creek Road in a good place.

**BALLFIELD LIFT STATION:** This is the current lift station and is being upgraded to take everything east of town. There will be a few modifications; concrete lids will be up from the ground and the generator will be moved away from the lift station for security.

**WATER RESOURCE RECOVER FACILITY:** There are six main components, that will be lined. Terrence explained the head works process of removing the solids out and how they will be disposed of.

**DISENFECTION SYSTEM:** Terrence explained how this process with flow back to Cow Creek in winter months and land apply other times.

**OVERLAND FLOW SYSTEM:** Terrence discussed this and said the city could put in a grass crop that can be watered through this system.

**WATER UPDATE:** Dig Well Idaho will hopefully be back in mid to end of November. The well house specs have also been approved.

Workshop ended 7:25pm

Next workshop will be held December 14
